

EM5500s

5500W Multi-purpose Generator

Extended run time

Generating a maximum output of 5500W, or an extended run time of up to 6.5 hours at rated load on a single tank of fuel.

Superb reliability

Legendary durability from Honda's commercial grade OHV series 4-stroke engine offers easy starting every time.

AVR output®

Automatic Voltage Regulator ensures constant voltage output regardless of the load, ideal for powering sensitive electronics.

Quiet operation

Reduced noise design allowing for a more comfortable, longer running time.

Oil Alert®

Prevents engine damage by automatically shutting the unit down if the oil drops below a safe operating level.

Durable frame

High quality welded and powder coated tubular steel frame for extended durability, easy lifting and light weight.

Switchable voltage

Choose between 115V and 230V to run almost any commercial equipment.

Multiple 115/230V output

Ideal for running 110V power tools or standard 240V appliances.

Circuit breaker outlets

Avoid equipment damage and injury in the event of a short circuit.

Optional kits

Transport wheels and hanger kit available dependent on model.

The EM5500 delivers clean power with extended run time, making it ideal for a wide range of demanding applications from home equipment back-up to powering equipment out in the field. Smooth power is achieved with AVR technology maintaining a constant output voltage, compensating for fluctuations when the equipment starts up or the load changes. This helps provide a stable power source vital for running sensitive electronic devices safely. Multiple outlet sockets with switchable voltage allow you to run different appliances and the large fuel tank, efficient 4-stroke engine and Honda's Eco-Throttle™ maximise running time.
